## PROJECTS

### Affiliato, Affiliate Link Crowdfunding — [App Link](#) | [GH](#)

MERN Stack, Redux, Flexbox & Semantic UI, Twitter API, Google Social Login

This web app is a crowdfunding platform powered by affiliate links. Built on top of MERN and Redux state management, flexbox and Semantic ui for styling, and Firebase Auth/Google Login for user auth.

### EZAbsentee, Absentee Registration — [Zeplin Link](#) | [GH](#)

MERN Stack, Redux, Material UI, Twitter API, Mobile Responsive (M.R.)

EZAbsentee is the silver bullet for absentee voter registration. After user fills out the required inputs, this web app will fill out and mail a physical copy of the absentee form registration for just a few bucks.

### Anime LunchBox, Watch & Save Anime — [App Link](#) | [GH](#)

React, Flux, Firebase RTDB, Firebase Auth, Flexbox, Kitsu API, M.R., Google Social Login

Allows users and guests to search for an anime and watch episodes via a Youtube iFrame. Logged in users, through Google Social Login or email, can save anime to their Favorites or their WatchList (Firebase RTDB).

### Transmorgi, API Experimentation App — [App Link](#) | [GH](#)

Microsoft OCR API, Google Translate API, IBM Watson Text-to-Speech API, sendGrid

A frankenstein of a web app, my colleague Joshua Maddox and I jumped through rabbit hole after rabbit hole to transform the text from an img file, into an audio file you can send as an attachment via email.

## EDUCATION

### University of California, San Diego — Political Science B.A.

September 2009 - March 2012

Studied Political Science but dropped out to pursue my passion in music and to explore the world outside of my 21-year-old bubble (via various part time jobs).
